Directions (1-5) : *Read the following passage carefully and answer the questions given below it.*

Business finance refers to the funds and monetary support required by an entrepreneur for carrying out the various activities relating to his/her business organisation. It is needed at every stage of a business life cycle. For instance, in starting a business, it is essential for acquiring fixed assets, such as land, building, plant and machinery etc. as well as for meeting the day-to-day expenses in the form of payment of wages and salaries, purchasing raw materials etc. In order to successfully operate and expand the business, funds are necessary for promoting and marketing the product; distributing it to the prospecting consumers; as well as for managing the firm's human resourcebase.

Further, in the changing business environment marked by increasing competition, additional funds are desirable for continuous modernisation and up gadation of the business unit. Though the amount of the capital needed by an enterprise depends upon the nature and size of the business, but its timely and adequate supply is indispensable for any form of individual set up (whether small, medium or large). Recognising this fact, the Government of India has evolved a well developed financial system in the country.

The financial system refers to an institutional arrangement through which the savings in the economy are mobilised and effectively allocated among the ultimate borrowers. It operates through a network of financial markets and institutions, which are broadly categorized into money market and capital market. Given this financial set up, the Central and the State Governments have been making all efforts for .meeting the

BANKERS SOCIAL ASSOCIATION

financial requirements of the entrepreneurs. These are in the form of several financial schemes and funding options offered by the ministries, public and private banks, small industries development organisation, national small industries corporation limited, state financial corporations etc. Thus, India has a sound financial structure which is capable of providing a strong base for setting up of business units in the country.

Growth of a business is essential for sustaining its viability, dynamism and value- enhancing capability. It reflects the ability of a company to earn higher profits and compete with the rivals in an effective manner. The three widely used measures of corporate growth are: Increase in sales. Increase in Profits and Increase in Assets. A company can achieve its growth objectives by expanding the existing market for its product and entering into new markets. Therefore, an entrepreneur must make a thoughtful analysis of all the possible options available to him for expanding his business by taking into account the inherent risks, the financial requirements and the surrounding regulatory framework.

Directions (1-10) : *Read the passage carefully and answer the questions given below it. Certain words/phrases have been given in **bold** to help you locate them while answering some of the questions.*

Some time ago, there lived a King. The King should have been contented with his life, given all the riches and luxuries he had. However, this was not the case! The King always found himself wondering why he just never seemed contented with his life. Sure, he had the attention of everyone wherever he went, attended fancy dinners and parties, but somehow, he still felt something was lacking and he couldn't put his finger on it.

One day, the King had woken up earlier than usual to **stroll** around his palace. He entered his huge living room and came to a stop when he heard someone happily singing away. Following this singing, he saw that one of the servants was singing and had a very contented look on his face. This **fascinated** the King and he summoned this man, to his chambers. The man entered the King's chambers as ordered. The King asked why he was so happy. To this the man replied: "Your Majesty, I am nothing but a servant, but I make enough of a living to keep my wife and children happy. We don't need too much, a roof over our heads and warm food to fill our tummy. My wife and children are inspiration; they are content with whatever little I bring home. I am happy because my family is happy."Hearing this, the King dismissed the servant and summoned his Personal Assistant to his chambers.

The King related his personal **anguish** about this feeling and then related the story of the servant to his Personal Assistant. Hoping that somehow, he will be able to come up with some reasoning that here was a King who could have anything he wished for at a snap of his fingers and yet was not contented, whereas his servant, having so little, was extremely contented. The Personal Assistant listened attentively and came to a conclusion. He said, "Your Majesty, I believe that the servant has not been made part of The 99 Club.""The 99 Club? And what exactly is that?" The King inquired.

To which the Assistant replied, "Your Majesty, to truly know what The 99 Club is, you will have to do the following: Place 99 gold coins in a

BANKERS SOCIAL ASSOCIATION

bag and leave it at the servant's doorstep. You will then understand what The 99 Club is."That very same evening, the King arranged for 99 gold coins to be placed in a bag at the servant's doorstep. Although he was slightly **hesitant** and he thought he should have put 100 gold coins into the bag, yet since his assistant had advised him to put 99, that is what he did.

The servant was just stepping out of his house when he saw a bag at his doorstep. Wondering about its contents, he took it into his house and opened the bag. When he opened the bag, he let out a great big shout of joy, "Gold coins. So many of them." Hecould hardly believe it. He called his wife to show her the coins. He then took the bag to a table and emptied it out and began to count the coins. Doing so, he realised that there were 99 coins and he thought it was an odd number so he counted again and again and again only to come to the same conclusion — 99 gold coins.

He began to wonder, what could have happened to that last one coin? For no one would leave 99 coins. He began to search his entire house, looked around his backyard for houses, not wanting to lose out that one coin. Finally, exhausted, he decided that he would work harder than ever to make up for that one gold coin to make his entire collection an even 100 gold coins.

He got up the next morning in an extremely **horrible** mood, shouting at the children and his wife for his delay, not realising that he had spent most of the night conjuring ways of working hard so that he had enough money to buy himself that gold coin. He went to work as usual — but not in his usual best mood, singing happily — as he grumpily did his daily errands. I Seeing the man's attitude change so drastically, the King waspuzzled. He promptly summoned his Assistant to his chambers. The King related his thoughts about the servant and once again, his Assistant `listened. The King could not believe that the servant who until yesterday had been singing away and was happy and contented with his life had taken a sudden change of attitude, even though he should have been happier after receiving the gold coins. To this the Assistant replied, "Ah! But your Majesty, the servant has now officially joined The 99 Club." He explained: "The 99 Club is just a name given to those-people who have everything but yet are never contented, therefore they are always working hard and striving for that extra one to round it out to 100 ! We have so much to be thankful for and we can live with very little in our lives, but the minute we are given something bigger and better, we want

BANKER'S SOCIAL ASSOCIATION

even more ! We are not the happy contented person we used to be. We want more and more and by wanting more and more we don't realise the price we pay for it. We lose our sleep, our happiness; we hurt the people around us just as a price to pay for our growing needs and desires. That is what joining The 99 Club is all about." Hearing this, the King decided that from that day onwards, he was going to start appreciating all the little things in life. .

Striving for more is always good, but let's not strive so hard and for so much that we lose all those near and dear to our hearts. We shouldn't compromise our happiness for moments of luxuries !

1.Why did the King summon the servant ?

1.Because the servant was singing a sad song.

2.Because he was fascinated by the happiness of the servant.

3.Because the servant had shown disrespect to him.

4.Because the servant was also assigned the job of a spy.

5.Other than those given as options

(1) 2 km/h
(2) 1.5 km/h
(3) 2.5 km/h
(4) 2.2 km/h
(5) None of these

Solution: 1

(1) ; Downstream speed of boat $= \frac{35}{\left(\frac{5}{2}\right)} = 14\,\text{km/h}$

Upstream speed of boat $= y$ km/h

According to question,

$$\frac{5x}{y} = \frac{7x}{14}$$

BANKER'S SOCIAL ASSOCIATION

(2) 32.5 m/s
(3) 30m/s
(4) 35m/s
(5) 25m/s

Solution : 3

Let the length of train = x metre and length of platform = 2x metre According to question,

$$\text{Time} = \frac{\text{Distance}}{\text{Speed}}$$

$$21 = \frac{x+2x}{S}$$

21 S = 3x

$$x = 7S \text{ m/s and } 18 = \frac{x+2x}{(S+5)}$$

6 (S + 5) = x

5 S + 30=7S [x=7s]s=30 m/s

12.The present age of Charu is 2.5 times the present age of Harsh. Had Harsh been two years youngerandCharubeen13yearsolder,Charu'sagewouldhavebeen3.5timesHarsh'sage.

What is Harsh's present age ?

a. 48years
b. 25years
c. 20years
d. 28years
e. 36years

Solution : 3

Let the present age of Harsh = x years
and present age of Charu = 2.5 x
According to question,

2.5 x + 13 = 3.5 (x - 2)

2.5 x + 13 = 3.5 x - 7

28. In a row of 34 students, W is fifth after X from the front and X is 20th from the back. What isthe position of W from the
front ?
(1) 20
(2) 25
(3) 30
(4) 22
(5) None of these

Solution : 1

Total students = Position of X from front + Postion of X from the back - 1
34 = Position of X from the front + 20 - 1

Position of X from the front = 34 + 1 - 20

= 15

∴ Position of W from the front = Position of X from the front + 5

= 15 + 5
